File Handling in C++

WebFile "A file is a logical collection of records where each record consists of a number of items known as fields". The records in a file can be arranged in the following three ways: • Ascending/Descending order: The records in the file can be arranged according to ascending or descending order of a key field..

What is File? - Chaudhary Charan Singh University

WebFile is a collection of records related to each other. The file size is limited by the size of memory and storage medium. There are two important features of file: 1. File Activity 2. File Volatility File activity specifies percent of actual records which proceed in a single run. File volatility addresses the properties of record changes. It helps to increase the efficiency of ...

Understanding File Attributes - 2BrightSparks

Weboperating system and software applications to define file system behavior. How are File Attributes Used? File attributes are pieces of information associated with every file and directory that includes additional data about the file itself or its contents. They can exist in only one of two states - Set or Cleared; similar to an On or Off state.
